Mean			\$1,266.40		\$3,327.31			
Median	\$1,982.56		\$1,246.87		\$3,185.77			

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Own-Source General Revenue as a Percentage of Personal Income by
Funding Dimension
and
Level of Government

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality. [With respect to the percentages covering a specified level of government or both levels combined, the categorical values for a particular state across Tables 3A, 3B, and 3C may yield a grand total that differs slightly from 100% because of statistical rounding.]

					ĺ	

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

²The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the percentages covering a specified level of government or both levels combined, the categorical values for a particular state across Tables 6A through 6G may yield a grand total that differs slightly from 100% because of statistical rounding.]

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

541411	*****								

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the percentages covering a specified level of government or both levels combined, the categorical values for a particular state across Tables 6A through 6G may yield a grand total that differs slightly from 100% because of statistical rounding.]

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the percentages covering a specified level of government or both levels combined, the categorical values for a particular state across Tables 6A through 6G may yield a grand total that differs slightly from 100% because of statistical rounding.]

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Table 6G: Percentage Impact of Outlay Dimension on Total Direct General Expenditures for Operating and Capital Functions by Level of Government, FY 2004 A 50 State Profile/1
